Professional Summary

Full-Stack Engineer with over 3 years of experience specializing in React.js, Next.js, and TypeScript. Skilled in developing responsive, high-performance web applications that drive user engagement and boost conversion rates. Strong front-end expertise complemented by solid full-stack capabilities, including backend API development, authentication systems, and DevOps implementation for scalable and reliable deployments.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, Zustand, Tailwind CSS, Bootstrap, Material UI, Styled Components, Responsive Design, Accessibility (WCAG), Progressive Web Apps
Backend: Node.js, Express.js, Python, FastAPI, RESTful APIs, Authentication (JWT, OAuth2), Caching (Redis)
Database: PostgreSQL, MySQL, MongoDB, Redis, Firebase, Supabase, Prisma ORM, Sequelize, Mongoose
DevOps & Cloud: GCP, Microsoft Azure, Docker, Kubernetes, GitHub Actions, Version Control (Git)
Others: Agile/Scrum, Jira, GitHub, CI/CD Pipelines, AI Integration (OpenAI API, Hugging Face, Ollama)

Professional Experience

Software Engineer (SDE-1)

[Penify.ai](https://penify.ai), Remote

May 2023 – October 2025

- Designed and developed a high-performance developer dashboard using React.js, TypeScript, and Redux Toolkit, improving load times by 25% and increasing user engagement by 30% through optimized rendering and state management.
- Built SEO-optimized, responsive landing pages and marketing websites using Next.js (SSR/SSG), TypeScript, and Tailwind CSS, achieving a 20% boost in search rankings and a 15% increase in conversion rates across devices.
- Integrated multiple payment gateways (Stripe, Razorpay, PayPal, Cashfree) into React-based frontends, reducing transaction processing time by 60% and supporting over 10,000 users with seamless checkout experiences.
- Collaborated with backend teams to integrate RESTful APIs using FastAPI and PostgreSQL, implementing JWT and OAuth 2.0 authentication for secure and scalable user sessions.
- Built and maintained CI/CD pipelines using GitHub Actions, Docker, and Kubernetes (AKS), reducing deployment errors by 40% and enabling faster rollback and recovery processes.
- Contributed to full-stack development with Python/FastAPI backend services, automated documentation generation, and real-time webhook integrations (Discord, Slack).
- Ensured code quality through peer reviews, adherence to best practices, and comprehensive documentation across GitHub repositories.

Freelance Software Engineer

Remote

March 2022 – May 2023

- Delivered custom WordPress solutions with responsive themes and plugins using PHP, HTML5, CSS3, and JavaScript, improving client engagement by 20% across multiple projects.
- Built interactive, mobile-responsive user interfaces with Vanilla JavaScript, ensuring cross-browser compatibility and smooth user experiences for small business clients.
- Experimented with modern frontend technologies including React.js, TypeScript, and Tailwind CSS through personal projects, establishing a strong foundation for full-stack development.

Frontend Engineer

[ZinEdu Classes](#), Remote

Aug 2021 – March 2022

- Developed a responsive student dashboard using React.js (Hooks, Context API), Bootstrap, and Sass, translating Figma designs into pixel-perfect UI and reducing load times by 30%.
- Implemented secure authentication systems with JWT and OAuth 2.0, improving accessibility by 30% and enhancing data protection by 25%.
- Refactored legacy React class components into modern functional components with Hooks, reducing code complexity by 40% and improving maintainability.
- Collaborated in an Agile/Scrum environment using JIRA for sprint planning and daily standups, ensuring timely delivery of high-quality features.
- Progressed from Frontend Intern to Junior Frontend Developer within two months, recognized for rapid skill development and consistent performance.

Education

B. Tech in Information Technology

Bengal College of Engineering & Technology, West Bengal

Aug 2017 – July 2021

Projects

[Portfolio Website](#) – Designed and developed a personal portfolio using Next.js, TypeScript and Tailwind CSS to showcase projects and skills.

[diff2commit](#) – AI-powered Git commit message generator that analyzes code changes and creates standardized commit messages following Conventional Commits specification through an interactive CLI.
